CREATING A THRIVING HYBRID WORKFORCE

Hybrid work is here to stay. Although some companies have embraced the "anywhere, anytime" approach to hybrid work, others prefer employees to come back to the office; but recognize that it's not likely to happen. As flexible work arrangements gain traction, several trends in virtual working models have emerged to assist in the evolution of the workplace.

To navigate this transition successfully, companies must design hybrid work arrangements with corporate and individual human concerns in mind, moving beyond institutional perspectives. This involves considering four critical dimensions: jobs and tasks, employee preferences, projects and workflows, and inclusion and fairness. Regardless of the hybrid work model you choose, discover how you can effectively attract, engage and still hold employees accountable for achieving results.
